

General Affiliate: Do I get credit for "http://unknown.referrer" clicks and searches?

7Search.com will not give credit for any revenue generated by an Unknown Referrer. When http://unknown.referrer appears within your account, it is created by a robot crawling on your website. It can also be caused when Web surfers visiting your site do not produce a referrer.

You will only receive credit when an actual URL appears in your account. You can prevent these Unknown Referrers from appearing by correctly installing your HTML search code.
